

I would like to see the FCC not do anything to lessen Indiana's Telephone Privacy Act. It has significantly cut down the number of troublesome telemarketing calls we were receiving in the early evening hours. At times it could be a very bothersome interruption. We would be receiving anywhere from 5-10 a week. I believe the US Mail is sufficient for these firm's soliciting efforts. It gives the consumer more control over whether they wish to entertain offers from these companies. Thank-you for this opportunity.
